EDUCATION

Igbinedion University Okada Nigeria
Bachelor of Science in Computer Science

Expected: September 2026

- Relevant Coursework: Java basics and fundamental, C++ basics and fundamental
- Python core fundamentals, Web Development (JavaScript).

EXPERIENCE

Neocloud Technologies
Backend and Devops developer intern
Abuja, Nigeria

April 2025 - October 2025

- Built a separate question bank system module from a cbt system using React, Nodejs(Express),Mysql, Docker and Nginx
- Increased performance and speed by 15% by reducing db query and included high level security to prevent attacks.
- Reverse Engineered a Laravel learning management system, Reduced db queries and containerized for cloud deployment.
- Designed and implemented CI/CD pipelines using GitHub Actions, accelerating deployment cycles by 20%.

Freelance
Full Stack Developer
Remote

May 2024 - January 2025

- Developed a chat web application using Laravel for backend, Livewire for frontend, Mysql for Database and Redis for caching
- Implemented pusher as a WebSocket for real time chat updates and notifications
- Implemented 2FA authentication increasing security by 20%

PROJECTS

Real-Time Chat Application
Technologies: Laravel, Livewire, Pusher(WebSocket), Mysql

- Designed a real-time messaging platform, using Livewire that comes with Alpine js for lightweight.
- Used the Laravel built- in authentication middleware for secured authentication and authorization
- Reduced message delivery latency with optimized WebSocket connections.

Cbt question bank system
Technologies: Reactjs, Nodejs, Express.js, Mysql, Nginx, cicd, AWS, Docker

- Implemented reCAPTCHA and 2FA for authentication improving security by 30% preventing unauthorized access
- Created Jwt validation middleware and RBAC middleware ensuring authorized and role based access

Employee Management System application
Technologies: React.js, Typescript, Go Lang, Mysql

- Built a Employee Management System that allows HRs createdmanage employees data, roles and department effectively.
- Included an Analytics dashboard showing total active departments, departments, roles and employees

TECHNICAL SKILLS

Programming Languages: JavaScript, PHP, TypeScript, Go lang

Frameworks and Tools: React.js, Node.js, Laravel, Docker, PostgreSQL, Mysql, git, ORMs, GitHub Actions

Concepts: Microservices Architecture, RESTful APIs, GraphQL, grpc, CI/CD, Version control
